

AHA comparator brand matrix

Logos

All

US

Global

Human side

Institutional

Rebuilt with 20 brands. Logos are normalized first, then placed on a matrix that asks how useful the brand feels as a guide and how human the experience feels.

Logo normalization check

Every mark sits on the same card and uses the same container. The differences you still see are intentional brand-shape differences, not random source-file scale drift.

US set

American Cancer Society

American Red Cross

St. Jude Children's Research Hospital

Mayo Clinic

Cleveland Clinic

Alzheimer's Association

Breakthrough T1D

American Diabetes Association

American Lung Association

Susan G. Komen

International set

British Heart Foundation

Heart and Stroke Foundation of Canada

National Heart Foundation of Australia

Heart Foundation NZ

Irish Heart Foundation

Deutsche Herzstiftung

Heart Research UK

Heart Research Australia

Singapore Heart Foundation

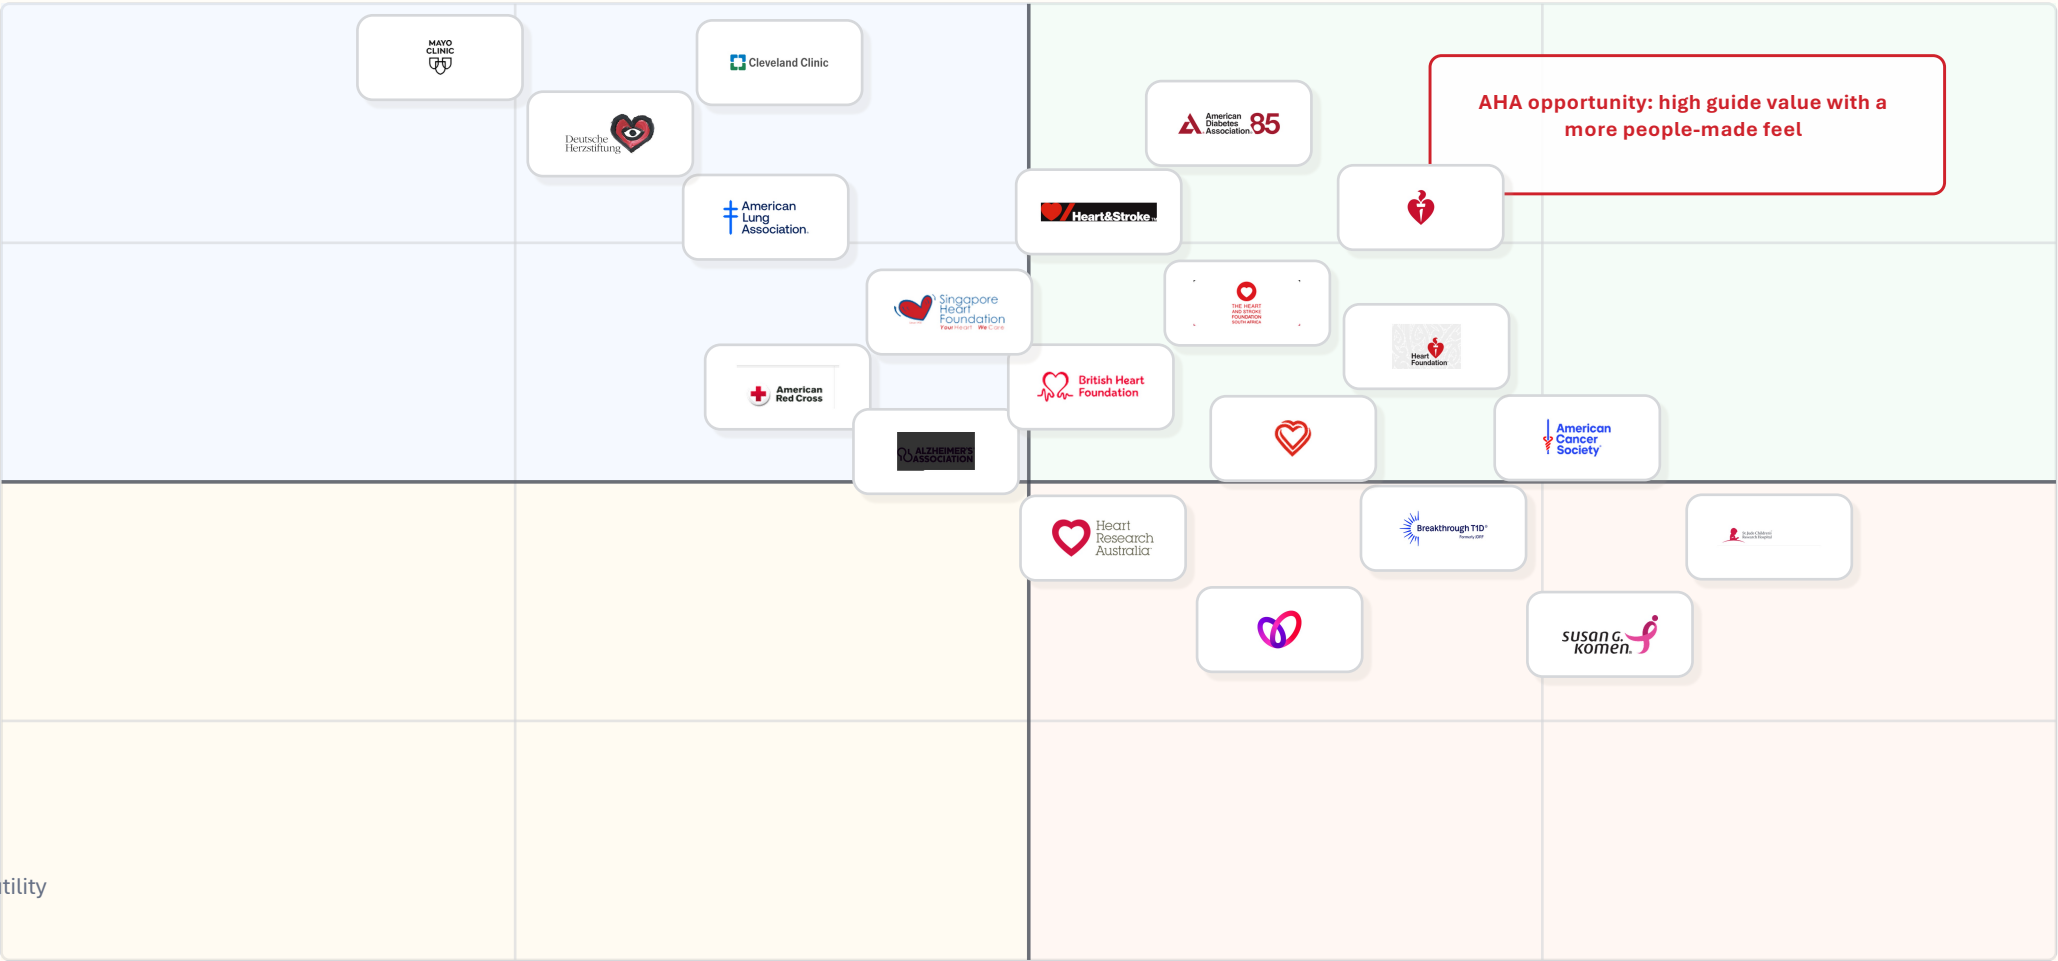

Heart and Stroke Foundation South Africa

AHA comparator brand matrix

Rebuilt with 20 brands. Logos are normalized first, then placed on a matrix that asks how useful the brand feels as a guide and how human the experience feels.

- Logos
- All
- US
- Global
- Human side
- Institutional

Higher guide utility

Lower guide utility

More institutional / system-led

More human / inviting

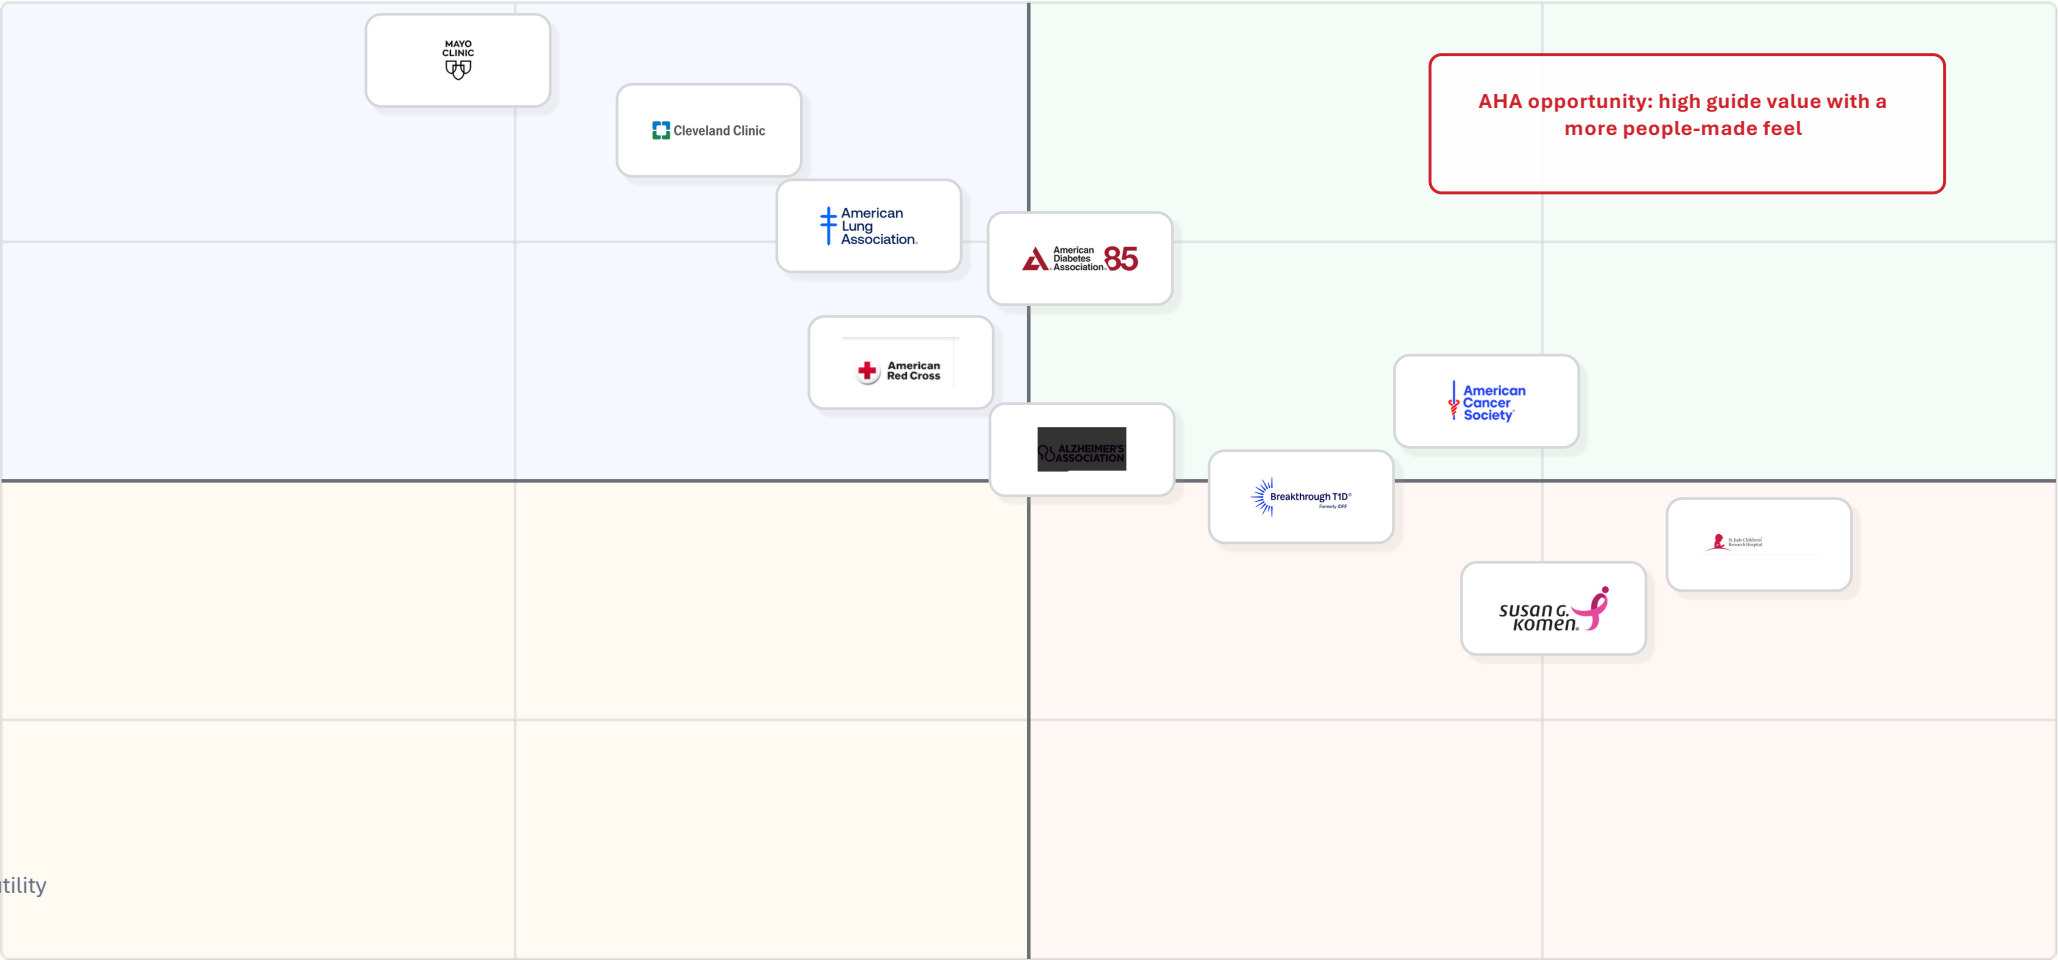

This is directional scoring from first-fold brand signals, not audited market research.
